

EDTA Cream for preparation of the root canal.

Features

- Debridement in the root canal
- Dissolution of pulp remnants
- Removal of smear layer
- Facile movements of canal instruments
- Microbicidal treatment within the canal
- Clearance of dentin tubules and apical area

Benefits

- Offers better smear layer removal, EDTA removes smear layer, softens dentin and facilitates the removal of calcific obstruction.
- Urea Hydrogen Peroxide reacts with Sodium Hypochlorite to produce oxygen bubbles that flush out debris within the canal.
- The lubricant medium facilitates instrument movement within the canal to eliminate instrument binding or breakage.
- Unclogged dentin tubules and apical area permit better penetration of root canal medicaments and fillings.
- Provides rapid cleansing and enlarging of canals due to EDTA which softens walls and smooth calcium deposits.
- Easier placement into canals than liquids.

Packages

- ITEM #2002-4100 – 2 syringes of 6g and 10 disposable tips
- ITEM #2001-6119 – 10 disposable tips

Excellent Smear Layer Removal

Before After
